

Contents

Unit One:

Introduction to Laboratory Animal Care

Chapter 1: The Field of Laboratory Animal Science 3

The American Association for Laboratory Animal Science	3
Why Are Animal Models Necessary?	4
Members of the Laboratory Animal Research Team	4
Interpersonal Relationships at Work	5
Career Opportunities in Laboratory Animal Science	5

Chapter 2: The Animal Research Environment 9

Animal Research Regulations	9
The Development of Regulations & Guidelines	9
The Guide	9
Facility Accreditation	10
Federal Regulations	10
Other Guidelines & Regulations	14
Bioethics & the 3Rs Principle	15
Reporting Concerns	15

Chapter 3: Facility Security & Emergencies 17

The Disaster Plan	17
The Security Plan	18
Emergency Response	19

Chapter 4: Occupational Health & Safety 21

The Health Screen	21
Personal Health & Safety	22
Types of Hazards	23
Signage	26
Handling Injuries & Accidents	26

Unit Two:

The Animal Facility Environment

Chapter 5: Facility Equipment 31

Sanitization & Disinfection Equipment	31
Husbandry Equipment	34

Fume Hoods	36
Biological Safety Cabinets	36
Autoclaves	36
Vacuums	37
Tissue Digesters	37
Incinerators	38
Scales & Balances	38

Chapter 6: Caging Systems 39

Caging Materials	40
Caging Systems	40
Large Animal Caging	42
Aquatic Caging	44
Cubicles	44
Agricultural Housing	45
Specific-Use Cages	45
Space Requirements	45

Chapter 7: The Laboratory Animal Environment 47

Microenvironment & Macroenvironment	47
Macroenvironmental Variables	47
Animal Room Design	50
Aquatic Room Design	50
Environmental Monitoring Systems	52
Emergency Backup Power	52
Barrier Facilities: Bioexclusion & Biocontainment	52
Quarantine & Isolation Rooms	53
Procedure Rooms	54
Feed & Bedding Storage	54
Equipment and Supply Storage	54
Personnel Areas	55

Chapter 8: Housekeeping Tasks & Contamination Control 57

Microorganisms Affecting Animal Health	57
Safety First!	57
Sanitization	58
Disinfection	58
Sterilization	58
Room & Equipment Cleaning	59

Waste Management	60	Chapter 14: Euthanasia	103
Pest Control	61	The Need for Euthanasia	103
		AVMA Guidelines on Euthanasia	103
Chapter 9: Feed & Nutrition	63	Methods of Euthanasia	104
Water	63	Verification of Death	106
Nutrients	64	Learning to Perform Euthanasia	106
Forms of Feed	65		
Types of Diets	66	Unit Four:	
Reward, Enrichment, & Behavior Modification	67	Research Techniques	
Shelf Life of Feed	68		
		Chapter 15: Introduction to Science & Metrics	111
Chapter 10: Husbandry	69	Scientific Terminology	111
Recordkeeping	69	Anatomical Terms of Location	111
Feeding	70	Units of Measurement	113
Watering	71	Basic Chemistry Concepts	116
Bedding	73		
Environmental Enrichment	74	Chapter 16: Experimental Design & Methodology	119
Animal Identification	74	Animal Models	119
Daily Cage & Room Monitoring	77	The Research Process	120
Urgent or Emergency Situations	79	The Research Question	120
		Types of Scientific Research	122
Unit Three:			
Animal Health		Chapter 17: Heredity & Breeding	125
		The Basis of Genetics: Genes & Chromosomes	125
Chapter 11: Animal Procurement & Quarantine	83	Mutations	126
Microbiological Status	83	Genetically Engineered Animals	126
Animal Procurement	84	Reproduction	127
Approved Vendors & Animal Transport	84	Breeding Colonies & Schemes	127
Receiving	85	Mating Systems	128
Examination	86	Maintenance of Breeding Animals	129
Animal Identification	86	Breeding Records	130
Quarantine, Acclimation, & Conditioning	86		
		Unit Five:	
Chapter 12: Medications	89	Species-Specific Information	
Types of Drugs	89		
Controlled Substances	90	Chapter 18: Mice	133
Drug Forms	91	Taxonomy and Nomenclature	133
Drug Expiration Dates	91	Anatomy & Physiology	134
Drug Storage Conditions	91	Sexing & Reproduction	135
Drug Administration	91	Behavior	136
Drug Treatment Records	93	Handling & Restraint	137
		Identification Methods	138
Chapter 13: Colony Health Surveillance	95	Husbandry & Diet	138
Health Surveillance	95	Environmental Enrichment	139
Animal Observation	95	Signs of Pain, Distress, or Illness	139
Causes of Diseases	97	Euthanasia	140
Transmission of Infection	98		
Sentinel Animals	99	Chapter 19: Rats	141
Diagnosis of Disease	100	Taxonomy	141
Detecting Parasites	100	Outbred Stocks & Inbred Strains	141
Vaccinations	100	Anatomy & Physiology	141
Tuberculosis Testing in NHPs	100	Sexing & Reproduction	142
Isolation	101	Behavior	142
Dead Animals	101	Handling & Restraint	143
		Identification Methods	143
		Husbandry & Diet	144

Environmental Enrichment	144	Behavior	168
Signs of Pain, Distress, or Illness	144	Handling & Restraint	168
Euthanasia	144	Identification Methods	169
Chapter 20: Hamsters	147	Husbandry & Diet	169
Taxonomy	147	Environmental Enrichment	170
Anatomy & Physiology	147	Signs of Pain, Distress, or Illness	170
Sexing & Reproduction	148	Euthanasia	170
Behavior	149	Chapter 25: Dogs	173
Handling & Restraint	150	Taxonomy	173
Identification Methods	150	Anatomy & Physiology	173
Husbandry and Diet	150	Sexing & Reproduction	173
Environmental Enrichment	150	Behavior	174
Signs of Pain, Distress, or Illness	151	Handling & Restraint	174
Euthanasia	151	Identification Methods	175
Chapter 21: Gerbils	153	Husbandry & Diet	175
Taxonomy	153	Environmental Enrichment	176
Anatomy & Physiology	153	Signs of Pain, Distress, or Illness	176
Sexing & Reproduction	153	Euthanasia	176
Behavior	154	Chapter 26: Swine	179
Handling & Restraint	154	Taxonomy & Breeds	179
Identification Methods	154	Anatomy & Physiology	179
Husbandry & Diet	154	Sexing & Reproduction	180
Environmental Enrichment	155	Behavior	180
Signs of Pain, Distress, or Illness	155	Handling & Restraint	181
Euthanasia	155	Identification Methods	182
Chapter 22: Guinea Pigs	157	Husbandry & Diet	182
Taxonomy, Stocks & Strains	157	Environmental Enrichment	183
Anatomy & Physiology	157	Signs of Pain, Distress, or Illness	183
Sexing & Reproduction	158	Euthanasia	183
Breeding Characteristics	158	Chapter 27: Ruminants	185
Behavior	159	General Characteristics of Ruminants	185
Handling & Restraint	159	Sheep	185
Identification Methods	159	Goats	189
Husbandry & Diet	159	Cattle	190
Environmental Enrichment	160	Chapter 28: Nonhuman Primates	193
Signs of Pain, Distress or Illness	160	Taxonomy	193
Euthanasia	160	Anatomy & Physiology	193
Chapter 23: Rabbits	161	Sexing & Reproduction	196
Taxonomy	161	Behavior	196
Anatomy & Physiology	161	Handling & Restraint	197
Sexing & Reproduction	161	Identification Methods	198
Behavior	162	Husbandry & Diet	198
Handling & Restraint	163	Environmental Enrichment	199
Identification	164	Signs of Pain, Distress, or Illness	199
Husbandry & Diet	164	Euthanasia	199
Environmental Enrichment	165	Chapter 29: Birds	201
Signs of Pain, Distress, or Illness	165	Taxonomy	201
Euthanasia	165	Anatomy & Physiology	201
Chapter 24: Cats	167	Sexing & Reproduction	203
Taxonomy	167	Behavior	203
Anatomy & Physiology	167	Handling & Restraint	204
Sexing & Reproduction	167	Identification Methods	205

Husbandry & Diet	205	Husbandry & Diet	218
Non-domestic Species	206	Environmental Enrichment	220
Environmental Enrichment	207	Signs of Pain, Distress, or Illness	220
Signs of Pain, Distress, or Illness	207	Euthanasia	220
Euthanasia	207		
Chapter 30: Fish	209	Chapter 32: Ferrets	221
Taxonomy	209	Taxonomy	221
Anatomy & Physiology	209	Anatomy & Physiology	221
Sexing & Reproduction	210	Sexing & Reproduction	221
Procurement and Quarantine	210	Behavior	222
Behavior	211	Handling & Restraint	222
Handling & Restraint	211	Identification Methods	222
Identification Methods	212	Husbandry & Diet	222
Husbandry & Diet	212	Environmental Enrichment	223
Environmental Enrichment	212	Signs of Pain, Distress, or Illness	223
Signs of Pain, Distress, or Illness	212	Euthanasia	223
Euthanasia	212		
	213	Chapter 33: Less Common Research Animals	225
Chapter 31: Amphibians	215	Horses	225
Anatomy & Physiology	216	Reptiles	227
Sexing & Reproduction	216		
Behavior	217	Glossary	235
Handling & Restraint	217	Abbreviations & Acronyms	261
Identification Methods	218	Appendix	263
		Index	269
