

Laboratory Animal Technologist

Preface

Mission Statement: AALAS is an association of professionals that advances responsible laboratory animal care and use to benefit people and animals.

The American Association for Laboratory Animal Science (AALAS) is a membership association of professionals employed around the world in academia, government, and private industry who are dedicated to the humane care and treatment of laboratory animals, as well as the quality research that leads to scientific gains that benefit people and animals. AALAS provides educational materials to laboratory animal care professionals and researchers, administers certification programs for laboratory animal technicians and managers, publishes scholarly journals, supports laboratory animal science research, and serves as the premier forum for the exchange of information and expertise in the care and use of laboratory animals.

First published in 1991, the *Laboratory Animal Technologist Training Manual* is derived from the *AALAS Manual for Laboratory Animal Technicians*, originally printed in 1967. The *Laboratory Animal Technologist Training Manual* is the third in the series of AALAS technician training manuals. The primary purpose of the series is to assist laboratory animal technical personnel in gaining the knowledge that will allow them to attain a high degree of professionalism in their field and to prepare for the AALAS technician certification examinations. If you have questions about the certification program and requirements, please review the information on the AALAS website at www.aalas.org regarding criteria to sit for the examination, exam content outline, and references for each exam level.

The material covered in the manuals reflects the knowledge level and tasks that have been identified for laboratory animal technologists in the Job Analysis Survey conducted by AALAS in 2013. In the current edition of this training manual, the material is intended to build upon prior knowledge that a certification candidate should have acquired by studying the *Assistant Laboratory Animal Technician Training Manual* and *Laboratory Animal Technician Training Manual* and *Laboratory Animal Technician Training Manual* in this series and the reference materials for each certification level.

Any suggestions or comments about the manual should be addressed to info@ aalas.org.

Contents

Unit One: Administration & Management	1
Chapter 1: Personnel Management	3
Management Skills	3
Functions of a Manager/Supervisor	4
Managing People	8
Managing Time	10
Staff Satisfaction & Productivity	12
Chapter 2: Personnel Training	19
The Importance of Training	19
Training Responsibilities	19
Development of a Training Program	20
Upkeep of a Training Program	22
Chapter 3: Facility Management	25
General Responsibilities	25
Financial Planning	30
Chapter 4: Facility Security & Disaster Planning	37
Facility Security	37
Risk Assessment	38
The Security Plan	39
Disaster Planning	41
After the Disaster	43
Chapter 5: Managing Compliance	45
Animal Welfare Act & Regulations	45
The US Department of Health & Human Services Pu Health Service Policy on Humane Care & Use of	ıblic
Laboratory Animals	48
Records & Record Retention	49
FOIA & Public Access to Documents	49
Facility Inspections & Site Visits	49
Controlled Substance Act	52
Local & State Laws	53
Good Laboratory Practices Regulations	53
Humane Transportation of Laboratory Animals	53
Occupational Safety & Health Act	55

Radioactive Materials	56
Medical Waste	56
Biosafety	57
Post-Approval Monitoring	57
Noncompliance	58
Chapter 6: Health Surveillance & Quality Assurance	61
Animal Procurement	61
Quality Assurance Program	65
Microbial Monitoring of the Environment	67
Equipment Monitoring	67
Environmental Monitoring	68
Chapter 7: Occupational Health & Safety	71
Components of the Occupational Health & Safety	
Program	71
Hazards in the Animal Facility	72
Exposure History Records	84
Minimizing Exposure to Occupational Hazards	85
Waste Disposal	87
Emergencies & First Aid	91
Unit Two: Biological Science & Biotechnology	93
Chapter 8: Biochemistry & Nutrition	95
Biochemical Compounds	95
Carbohydrates	95
Lipids	96
Proteins	98
Vitamins	99
Minerals	99
Fiber	99
Special Nutritional Requirements	100
Biochemistry & Animal Models of Disease	102
Chapter 9: Molecular Biology	105
Chromosomes	105
Structure of DNA	106

Structure of RNA	106
Cell Division & Replication	107
Protein Synthesis	107
Techniques in Molecular Biology	109
Detecting the Presence of Biomolecules	110
Techniques in Molecular Biology	90
Chapter 10: Genetic Engineering	113
Genetic Engineering of Laboratory Animals	113
Managing a Transgenic Facility	114
Generating Transgenic Animals	117
Techniques for Creating Genetically	
Engineered Mice	119
Breeding Transgenic Mice	120
Generating Gene-Targeted Mice	121
Assessing Genotype	123
Assessing Phenotype	124
Changing the Background Strain of Mutant Mice	124
Cryopreservation	124
Chapter 11: Gnotobiotics	127
Equipment for Gnotobiotics	127
Storilization	127
Gnotobiotic Methodology	129
GIOLODICIE MELIOGOOGY	130
Unit Three: Animal Health	133
Chapter 12: Immunology	125
The Immune System	125
The Principle of Immunization	1/1
Discassos of the Immune System	1/12
Transplantation	145
	120
Prevention, Control, & Treatment of Infectious Disease	136
	4 4 7
Chapter 13: Agents of Infectious Disease	147
Bacteria	14/
Viruses	149
Prions	151
Fungi	151
Parasites	152
Helminths	154
Arthopods	156
Chapter 14: Common Health Problems of	
Laboratory Animals	159
Health Problems Affecting Multiple Species	159
Rats & Mice	161
Other Laboratory Rodents and Rabbits	162
Ferrets	163
Dogs	164
Cats	165
Nonhuman Primates	165

Ruminants	166
Swine	167
Aquatic Species	168
Amphibians	168
Fish	169
Chapter 15: Diagnostic Techniques	173
Parasitology	173
Hematology	175
Serum Chemistry	177
Urinalysis	178
Microbiology	179
Necropsy	180
Histopathology	181
Diagnostic Imaging	182
Common Imaging Techniques	183
Chapter 16: Pharmacology	187
Pharmacology	187
Pharmacokinetics	187
ADME	188
Drug Interactions	190
Toxicity	191
Multimodal Therapy	191
Treatment	191
Animal Monitoring	192
Drug Information	192
Commonly Used Drugs	194
Chapter 17: Anesthesia & Analgesia	199
Anesthesia	199
Anesthetic Dose Calculation	201
Anesthesia Regimen	202
Induction & Maintenance Anesthetics	203
Inhalant Anesthesia Systems	206
Monitoring General Anesthesia	209
Analgesia	212
Postanesthesia & Emergency Care	213
Euthanasia	214
	215
Unit Four: The Research Process	215
Chapter 18: Study Design & Data Handling	217
Impact of Bias	217
Characteristics of a Good Study Design	217
The Research Question	218
Study Design	218

Study Design	210
Basic Concepts in Data Analysis	220
Glossary	223
Abbreviations & Acronyms	249
Index	251
